## **HONORARY SECRETARY REPORT FOR 2022 AGM**

### **INTRODUCTION**

It is my delight to welcome you, the distinguished members of our society, to this year's annual general meeting. Firstly, before I begin, I would like to take a moment and reflect on last year which still had Covid-19 challenges. The society grieved the loss of our members, colleagues and our loved ones, and amidst these challenges we still came out victorious in many aspects of our profession as highlighted in various talk points below and in all this we thank the Almighty God for His guidance and protection.

The council wishes to seek your wisdom as we bring forth some of the achievements and challenges we as SORK went through in the year 2021. We seek your indulgence as we put forward some proposals to continually improve our society.

### **OFFICE OPERATIONS POLICY AND PROCEDURE**

The office has adopted use of consultancies in various areas of expertise to enhance professionalism, accuracy, integrity and smooth flow of our procedures.

Some of the areas include ICT, accounts and with the latest being legal services as approved during the last AGM.

Among ongoing projects through the consultants is development of ICT infrastructure; Advanced SORK Website, which some are already in completion like the RASCO portal which was used during our last conference. Ongoing projects include members' portal and complete restructuring of the current website to include automatic payments gateways, self-services for members like digital/e-certificates, SORK journal host that will build our profession through articles and research publications, alongside enhanced instant communication through the advanced website

linked to other existing social media platforms like Facebook, WhatsApp and Twitter. As council, we therefore urge to respond positively and register in the upcoming website once it's complete that will link all radiographers in the country as well as anywhere in the Globe.

We have equally engaged the accountants and the legal services to the maximum. With monthly book keeping reports and legal touch of our documents and procedure where necessary.

The council would also like to commend members on the level of conduct on social media.

## **RADIOGRAPHY TRAINING IN KENYA**

We wish to inform members that the council is fully committed towards quality training. On the same note the council has embarked on a journey of prescribing the maximum number of radiography students admissible per year with respect to training resources and requirements as it will be prescribed by PDERC committee. This has dully been justified based on the fact that students usually crowd in practical areas rendering to poorly trained professionals and the fact is that there are a few trained clinical instructors, which also jeopardize the training.

We have already managed to run successful student indexing and we intend to use the same process in achievement of above-mentioned objective.

## **CONTINUOUS MEDICAL EDUCATION**

CME is crucial prosperity for any healthcare provider and the society has embarked on regional CMEs to enhance member skills and encourage knowledge sharing despite the Covid-19 issue that affected most of our operations. The council managed to hold 10 CMEs as tabulated below.

I take this opportunity to thank all the sponsors who worked with us to make the CMEs a success and just mention a few we had GE PEDX and Mindray on the same note I urge members to lobby for sponsorship and partnership at whichever level one is . It is imperative to express that sponsors work well when they have members from the society who interact with them directly.

I also make a kind appeal to you members to be attending these meetings to enhance your skills and also as part of mandatory requirement the Ministry of Health on CPD point. It is worthwhile to

note that we are in the process of developing our ICT infrastructure and part of will include CPD point management system.

## **CONSTITUTION AMENDMENT**

The council has requested and tasked the PEILAC committee to relook at some few constitutional amendments some to include adoption of National student association into the council.in this we intend to have an amalgamation of all students' leadership to have a body that can be directly be co-opted or will directly address with council regarding student matters.

The SORK constitution requires periodical revision and amendment. Last year, SORK council explored the need to have active regional offices, the council held two benchmarking meeting with the both Kenya medical Association and Pharmaceutical Society of Kenya where we got some insight on how successful we can be able to run branches, as council we wish to inform that the process is still on going, and council will update the members on the visibility of the outcomes.

## **RASCO 2021**

Despite the challenges that we had in 2020, we had a successful conference i.e. the 9th RASCO in Mombasa held on 20th to 23rd October and this was deviation from our normal sequence. Going forward the council evaluated the possibility of going back to the earlier schedule which would translate to holding RASCO this year but due to possible apathy from sponsors and members' participation owing to the political temperature this year, we shall now adopt the new orders of the years. Notably, last year we realized quality abstracts were presented and take this chance to thank to all the three committees namely; RASCO Central Committee, RASCO Scientific Committee and Local Organizing Committee and the council for a well-organized conference. Indeed, it was

one of the well-attended meeting with over 180 delegates in attendance and over twenty-two scientific papers presented.

The council would like to appreciate GE Healthcare (General Electric), Philips EA Health Care, GE Pdx, German Medical Center, Nairobi x-ray Supplies Limited, Harley's Limited, Megascop Healthcare, Crown Healthcare and Nairobi Enterprises Limited for sponsoring the conference and making it a success.

Regarding RASCO 2023, the council plans to have all the committees responsible in place early enough to enhance quality works for presentation thus allowing members to carry out activities that might need data collection also to enable time for resources mobilization.

## **RADIOGRAPHY BILL**

Dear Members it has been long journey to realize the regulatory wing of our profession. I wish to thank every member who took part in one way starting with the bill advisory committee and just to mention them; Mr. Longino Mcheusi, Mr Simon Mwihoti, Mr Bernard Ondari, Mr. Caesar Barare, Mr. Antony Mamati Dr. Solomon Kilaha, Ms. Nelly Rono and Gloria Mwandikwa. On the same note recognize the parliamentary liaising team; Jervas Kenyanya, Kenneth Kariuki and Samuel Karanja. I cannot forget to thank the council and SORK members for the immense support even by prayers that you have made towards this process.

Currently the bill is at the third reading and we were optimistic to have concluded the process by December last year but due to unavoidable reasons we did not manage. However, the council has put up strategies to ensure we use our last bullet to conclude on this despite this year being an election year. Some of the approaches which include delegation of our bill based on members of

## **WORLD RADIOGRAPHY DAY**

Last year we had a successful world radiography day in partnership with Mater Misericordiae Hospital with Ilara Health Limited and Mindray as sponsors of the walk.

SORK in partnership with KMTC department of radiography and imaging held a world radiography day parallel celebration in KMTC Kisumu campus.

We managed to carry out the following activities including;

1. Free breast and prostate screening.
2. Awareness walk with an escort of a police band and brochures that explained Radiography Profession.
3. Talks and speeches regarding World Radiography Day.
4. Media talks shows and coverage at several stations to include -World radiography talk in Capputtchin TV -opportunities in radiography at elevate TV  
-World radiography adverts at citizen TV  
-World radiography coverage at Kisumu by Ramogi FM

It is important to note that the event put SORK and the profession into the face of the world to extent it was quoted by the leader of majority during the second reading of Radiographers Bill.

I take this chance to thank the team that was involved in making this day a success. The team from Mater led by Madam Elizabeth Maswili, Mercy Mworja and Jackline from the marketing department, the team from Council led by the SORK President; Jervas Kenyanya, Lucy Akoth Nimrod Onyanha and Samuel Karanja not forgetting the Kisumu team led by Madam Vivianne Ochiel, Joseph Waweru the CEO KMTC and all the Heads of Radiography in all campuses, including

the JKUAT team. Our focus during this day usually are the students who were involved intensively on both Nairobi and Kisumu meetings.

## **RADIOGRAPHY STUDENTS CONFERENCE**

The society plans to host its first ever student-focused conference. We aim to inspire students to pursue and publish their research and abstracts, all while partaking from experienced professionals and learning through hands-on workshops. The council has envisioned establishment of the same and other activities geared towards educating, motivating and exposure to the radiography and imaging students.

Students who wish to develop their research and presentation skills will have a chance to network with like-minded peers and professionals. They will learn from Radiography professionals in the country and globally in group workshops or during our keynote lectures and they will find the conference an inspiring and mentorship environment. Students with no abstracts to present, will join as passive participants and will have full access to two- three-day conference.

### **The conference aims in achieving the following objectives**

- To provide radiography students with opportunities to present their research findings in professional environment to include international setting with structured feedback;
- To provide a platform for career development and to help develop the scientists of the future.

- To promote interactions among Radiography students from different colleges and countries
- To promote and encourage innovative thinking by exposing students to current issues in Radiography in Kenya and beyond.

Through partnership with Radiography schools in Kenya, international universities other stake holders like WRETF, we aim to carry out a successful program that will attract participants from all over the world in Mombasa at Kenya Medical Training college grounds during this year's first students conference and mentorship that will culminate into to this year's World Radiography Day celebrations .where we aim to set standards even for other campuses to emulate. The society has already engaged KMTTC and JKUAT management towards preparing students for the said students conference by involving them in a series of academic and clinical events such as chest x-ray competitions, best clinical students competitions and best paper writers etc, to form part of the student conference awards.

## **ESTABLISHMENT OF NEW COMMITTEES**

### **Fund Raising and Finance Committee (FRFC)**

The council seeks to establish SORK Investments and Resource Mobilization Committee.

The council has been put this forward to impact on it revenue stream, still as we seek the economy of scale and numbers to develop individual members economically.

### **Publicity and Public Relations Committee (PPRC)**

The council seeks to put the profession at the limelight, in lieu of this the council has created this committee to help in developing a public relation protocol that will promote interests and
